

GOOGLE EARTH

The very basics of using Google Earth for finding and using images.

TO SEARCH THE MAP

1. To search for a location, I need to use the search block and click the magnifying glass

TO NAVIGATE THE MAP

1. I can navigate the map by using the navigation buttons at the top right of the screen
2. The navigation buttons appear when I move the mouse over them.
3. Label the navigation buttons...

BOOKMARK A LOCATION

1. Browse to a location using the search and navigation buttons
2. Click the Placemark button (push pin) above the map
3. The Push Pin will appear on the map
4. Drag the Placemark to the location, name it and click OK
5. The bookmark will appear under the Places block

TAKE A SCREEN SHOT OF A LOCATION

1. Browse to a location using the search and navigation buttons
2. Go to Edit: Copy: Copy Image
3. A screen shot is invisibly held on the computer clipboard
4. Open any application (Email, Word, PowerPoint, etc) and Paste screen shot
5. Screen shot will appear after Pasted
